Management review

One ERV company in the Nordics

In 2015 Europæiske Rejseforsikring A/S in Denmark and ERV Försäkringsaktiebolag (publ) in Sweden implemented one crosscompany organizational structure as a first major step towards acting as one Nordic company. In 2017 we aligned the legal structure of the two companies and thereby cemented the position as one Nordic insurance company – ERV Nordic.

In legal terms, Europæiske Rejseforsikring A/S in Denmark was the continuing entity whereas ERV Försäkringsaktiebolag (publ) continued as a branch of Europæiske Rejseforsikring A/S by the legal name of Europeiska ERV Filial. Both the Danish and Swedish entities have locally continued with their brand names and logos; Europæiske ERV and Europeiska ERV.

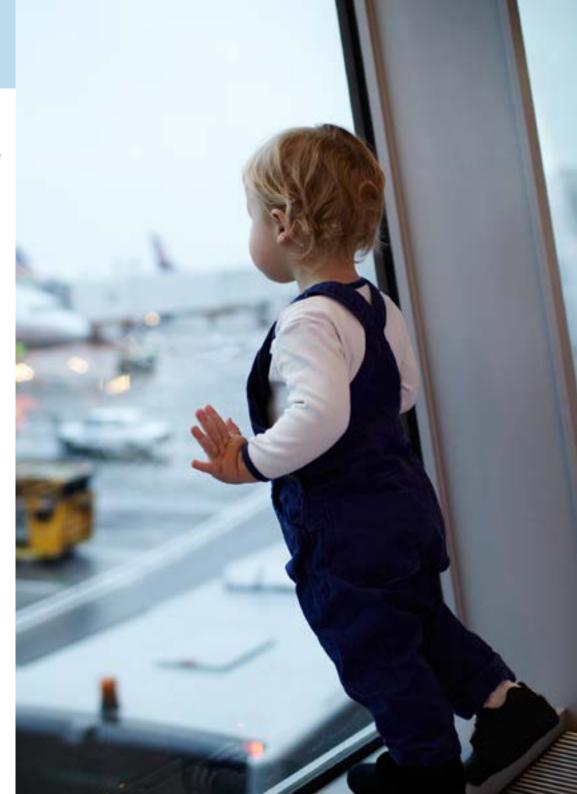

In this annual report, we use the term ERV Nordic when referring to both Europæiske ERV and Europeiska ERV. When only referring to Europæiske ERV we use ERV Denmark and similarly with Europeiska ERV we use the term ERV Sweden.

Financial result in 2020 impacted by the corona crisis

ERV Nordic delivered a negative financial result of DKK -30.3m in 2020. This was in line with expectations and explained by

the extraordinary negative impact of COVID 19. The spread of COVID 19 and the actions taken by authorities during 2020 had a significant negative impact in regards to travel insurance sales and claims. Furthermore, the coronavirus also affected negative results of our affiliated company.

Our diversified Nordic market and product approach together with a prudent reinsurance program have however partially reduced the negative impact and enabled the company to maintain a solid financial position.

January:

Corona pandemic

The spread of COVID 19 and the actions taken by authorities in Denmark and Sweden effected both our customers and employees due to restrictions and lockdown in both countries. The Business Continuity Plan has been initiated very smoothly, which allowed an immediately start of working from home and at the same time supporting our customers to safely return home when it was advised by Ministry of Foreign Affairs.

November:

New product: Travel Security Hotline - Global travel security service

Together with one of the world's leading providers of security services, Crisis 24, ERV Nordic launched a 24/7 security consulting and assistance – Travel Security Hotline.

The service ensures that the corporate customers have unlimited access to security consulting and assistance with one point of contact for all inquiries. The security advisers have experience from the military and intelligence service and are trained in analyzing and assessing security risks at a local as well as global level. This ensures that the corporate customers have the best conditions for safe and secure business trips around the world.

Travel Security Hotline is offered to all corporate clients who already have a CTI or CEI insurance at ERV Nordic.

December:

Marketing campaign - SkiStar

Winter seasons started in December with ERV Nordic promoting insurance for skiing holiday with billboards, ski lift and digital screen advertising placed at prime

positions in all SkiStar resorts in Sweden and Norway. Marking activities also included digital presence on SkiStar web and online purchase funnels for travel booking. Ski resorts in Sweden have been fully occupied this winter, which ensured a high reach to customers.

January February March April May June July August September October November December

January:

Renewed contracts with Swedbank and Entercard

ERV Sweden prolonged the collaboration with two key partners, Swedbank and Entercard - both leading players in the financial sector on the Swedish market.

Swedbank

also includes ca

September:

New collaboration with Klarna

ERV Sweden started a new collaboration with Klarna as insurance provider behind the new travel insurance that is included in Klarna's payment and credit card, the Klarna card. It supports ERV Nordic's strategy in developing parnerships with new, innovative and fast growing players. The travel insurance covers delays on both luggage and means of transport, and the product also includes cancellation insurance.

October:

Extented Collaboration with SkiStar

ERV Nordic expanded the collaboration with the leading ski resort operator in North Europe, SkiStar. The collaboration now includes cancellation, ski and bike (summer season) insurance, kids ski school insurance.

December:

Video Doctor - new digital supplement to alarm services

ERV Denmark started a new collaboration with the digital health service, Eyr Medical, which ensures that leisure customers are able to get help and counselling from Danish doctors via video consultation while traveling abroad.

It is another strategic milestone on ERV Nordic's digital roadmap, as this ensures that we are now able to offer a digital supplement for the current alarm services and secure, that the customers get the best possible help and support, when they are traveling abroad.

"We work to make customers feel safe under all circumstances"

Our mission

"We work to make customers feel safe under all circumstances"

Our mission is to ensure that travelers and people with special, mostly free time related insurance needs always will be adequately insured with us.

Our vision

Our vision is to be the market leading, internationally capable, Nordic niche insurer that enhances quality of life of our customers with customized, simple, easy and quick solutions relating to travel and other free time related special risks. This vision is also reflected in the ERV Group's eight values, which are:

- Costumer focus
- Excellence
- Courage
- Passion
- Teamwork
- Forward looking & Sustainable
- Openness & Trust
- Leadership & Responsibility

Part of a strong Group

ERV Nordic is a subsidiary 100% owned by ERGO Reiseversicherung AG, which in turn is part of ERGO Group AG and Munich RE Group¹ - the international reinsurance leader. Our financial system, investment portfolio management and some data reporting are outsourced to companies within the group. Furthermore, a part of the claims handling abroad is outsourced to Euro-Center Holding SE that is mainly owned by our group.

 $^{^{}m 1}$ The legal name of Munich RE Group is Münchener Rückversicherungs-Gesellschaft Aktiengesellschaft

ERV Nordic is associated with the following companies: Registered office Activity Shareholding Affiliated company ERV Pojistovna a.s. Czech Republic 75 % Insurance Associated company: Euro-Center Holding SE Czech Republic Assistance 33.34 % European Ass. Holding 20.00 % Germany Assistance

ERV Nordic is member of the International Travel Insurance Alliance (ITIA) uniting specialized insurers from all around Europe with ambition to expand outside Europe as well.

Via this association, we can closely co-operate with many travel insurers on an international level and deliver international solutions to our partners.

Organizational chart

ERV Nordic has this organizational structure:

Our core business

ERV Nordic's primary business areas are sale of travel insurance to private customers in the leisure market including BtC, BtBtC; as well as in the corporate market together with health insurance for employees stationed abroad. Our direct business is focused on the markets in Sweden and Denmark. Through insurance professionals and distribution partners, we are also active in Norway and Finland.

ERV Sweden offer travel insurance through Card schemes as well as more affinity group centred business especially in the areas of jewellery and watches. The majority of travel insurance policies are sold either as trip-by-trip insurance or as annual travel insurance in connection with ERV Nordic's customers' holiday trips, business trips or expatriation. Main distribution channels for all travel insurance policies and health insurance policies are either direct business or brokers in the relevant markets.

In 2019 ERV Denmark cooperated with Dansk Sundhedssikring A/S and sold domestic healthcare insurances. This significantly added volume to our existing insurance portfolio in 2019 with minor impact in the 2020 run-off period.

ERV Denmark also has a health portfolio of international healthcare insurance that has been in run off since 2013.

Strong reputation, digitalization and customer focus

ERV Nordic has a strong business-to-business and end-consumer reputation. As a well-established specialty insurance company, ERV Nordic focus on providing coverage customized to the policyholders needs, rather than offering products with the lowest premium. In addition, it has been a major priority in recent years to invest in our digital platform where we interact with potential new customers (Sales) as well as existing customers (Policy Administration, Corporate Support and Claims) in state-ofthe-art technical applications. Our distribution partners' sales approach has changed and we adjusted to that. Our broker relations mainly build on large international insurance brokers, strong domestic broker networks, and local travel agencies, both individual and organized in groups.

The Nordic insurance market

The customer base consists mainly of crossborder travellers from Denmark and Sweden. both leisure and corporate trips. The small geographical size and northern location of the countries ensures the stability of the market potential as these two factors create a desire for the citizens to travel outside the country. The market competition in Leisure consists primarily of larger insurance companies, which offer the product as part of a package deal with family insurance. In addition to this, the Danish public healthcare system in 2014 changed from covering a part of the health risks related to travel insurance in Europe to cover none (from the yellow card to the blue card), which actually

has provided a larger market potential. Changes in the public healthcare system, both on local- and EU level, could contribute positively by increasing demand but also attract new players to that segment increasing competition.

However, restrictions related to the COVID 19 have had significant impact on travel segment and heavily reduced volumes in 2020. A full recovery to levels from year 2019 is expected earliest in 2024.

Similar to Leisure in the business segment, market competition comes from larger insurance companies that cover several insurances outside travel, such as liability and property. In business segment there was also significant COVID 19 impact because majority of companies put on hold business travels.

Business Travel Trends

Travel budgets have always fluctuated in line with the economy. Firms are more relaxed about travel spend in the good times and tighten their belts in the bad. That is why when travel restrictions are waived it takes time before number of business trips come back to situation before COVID 19. In Europe companies have become more cost-conscious, introducing more sophisticated tools to control business expenses and got used to making smarter use of technological alternatives such as videoconferencing.

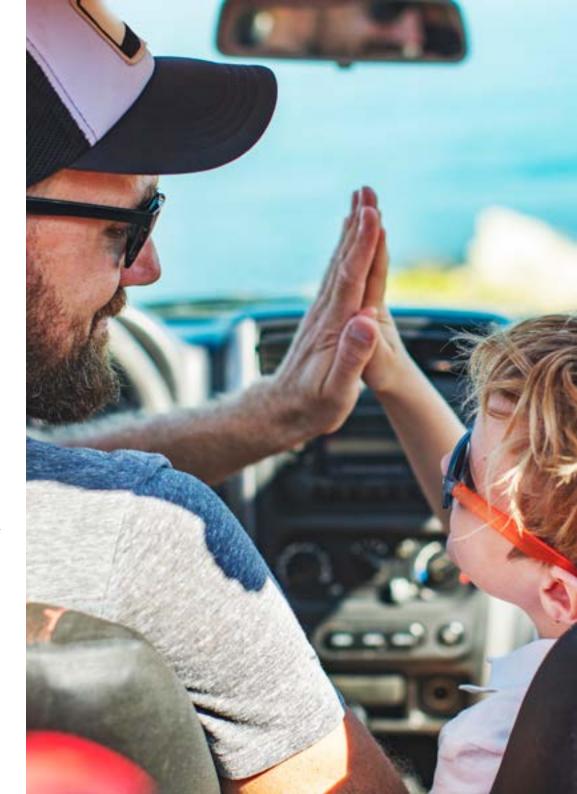

But as videoconferencing is increasingly a supplement, it will not replace business travel. For example in Asia direct face-to-face contact is a particularly important component of ongoing business relationships.

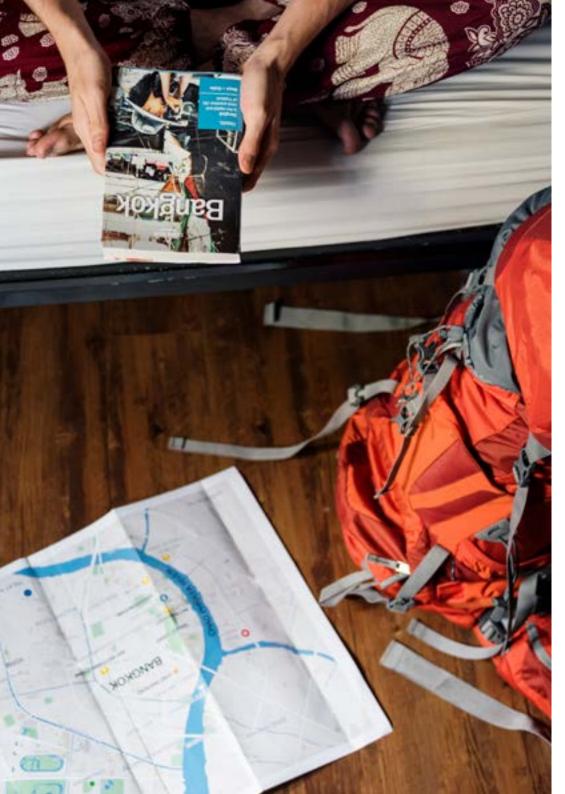

Most companies today have guidelines regarding how they shall reduce the environmental impact, giving directions to choose climate friendly transportation and usage of technical solutions to reduce number of travels.

Leisure Trends

The trends for leisure and travels are changing due to two big threats world population faces: pandemic and climate change. Contrary to the earlier trend to take more frequent, shorter trips, most likely people will limit number of trips abroad per year and focus more on longer vacations. This trend also becomes stronger because of some forward-thinking start-ups that are stressing the importance of work/life balance as part of their corporate culture. In addition, Millennials (who have shown themselves to value "recharging the batteries" and the "work hard play hard" ethos), now have the disposable income to shape travel trends.

Sustainable factors, for example environmental, are increasing in importance when it comes to impact on travel patterns. As an example, 23% of Swedes states (Vagabond Resebarometern 2019) that they will chose an environmental friendly way of travelling.

New entrants are disrupting all facets of the travel industry. New companies, products, and trends will alter the way we fly, drive and stay. The development of internet based and mobile technologies drives the demand for a seamless travel experience. Seamless travel refers to travel utilising a variety of products and services organised through a single booking process.

Trends for Travel insurance market

The Nordic market for free-time and travel insurance is defined by fierce competition including both general insurers and niche insurers. In travel insurance ERV Nordic plays a dominating role in the Swedish and Danish market. Profitable growth opportunities are limited with the traditional products and channels.

In Sweden (different from DK) all four large P&C insurers decided to package a basic travel insurance cover into their existing home insurance offerings 15-20 ago. This changed the business model for ERV Sweden significantly and switched the offerings to become largely a supplement cover to the (new) market standard base cover. 97 % of all Swedes have a home insurance cover. The coverage is however only up to 45 days and is a basic travel insurance offering.

In Denmark the P&C insurance companies have covers for travel included in more general insurance products and increasingly offer extended travel insurance as ad-on.

Pandemic situation related to COVID 19 has increased customers' awareness and demand for comprehensive insurance products that could provide customers 'peace of mind'.

Claims handling

ERV Nordic's Assistance Network handles emergency assistance cases that occur in all parts of the world from small cases such as outpatient cases to bigger and more complex cases involving air transport. Many cases are complex medical cases, which are handled in close cooperation with our specialized assistance company Euro-Center Holding SE. The Euro-Center Assistance office in Madrid handles all ERV Nordic's assistance service and with service offices on six continents ERV Nordic's customers have one of the world's largest medical networks of experienced professionals and Nordic speaking staff available.

As part of ERV Nordic's strong digital focus, we offer our customers a smooth and convenient online claims handling process. The digital journey is constantly under development with new tools and simplified steps in order to secure a smooth, fast and convenient customer experience.

ERV Nordic Strategy

In order to be a niche leader ERV Nordic continuously needs to improve operational setup and grow faster than market average. That is why ERV Nordic has used the time during COVID 19 lockdown to implement enhanced systems and

processes and prepare for development, launch and market penetration of future business. We have continued our strategic initiatives in the following four focus areas:

- Sustainability
- New Business
- Efficiency & insights
- Digitalization & IT Landscape

Sustainability

We will strive to sustain current business, customer base and revenues. This will be done by positioning ERV Nordic as premium supplier through customized service and offerings, leading in quality as well as ease of use.

New Business

We will develop new products and offerings within and outside our niche through advanced customer analytics and efficient development processes. This is to be done in close collaboration with customers in order to reflect their needs and demands.

Efficiency & insights

We will increase our capability to be compliant towards stakeholders and at the same time be efficient and customer focused. This will be achieved by using digital systems and tools aligned with clear responsibilities and objectives.

Digitalization & IT Landscape

A basis for all initiatives above. IT and digitalization have to move from IT department to be the centre of everything we do.

Digitalization is not just systems, but also requires a new way of working for all func-

tions within ERV Nordic.

ERV Nordic's financial result

In 2020, ERV Nordic realised a negative result after tax of DKK -30.3m, compared to a negative result of DKK -7.1m last year. The spread of COVID 19 and the actions taken by authorities during 2020 had a significant negative impact in regards to travel insurance sales and claims. Furthermore, the coronavirus also affected negative results of our affiliated company.

Gross written premium amounts to DKK 295.2m compared to DKK 687.7m in 2019, a substantial decrease of DKK 392.5m. The decrease is due to negative impact by the corona crisis on our travel insurance sales and the discontinued sales of domestic healthcare insurances through the Danish partner Dansk Sundhedssikring A/S.

Gross claims incurred amount to DKK 195.6m against DKK 391.7m in 2019, a decrease of DKK 196.1m. As a direct effect of the decreased portfolio on mainly healthcare insurance, this development was expected. The gross claims ratio however increased to 60.4%, which is 2.5 percentage-points higher than in 2019. Corona crisis related claims mainly in ERV Denmark negatively affected the gross claims ratio. In the ERV Sweden Card and Corporate segments, we have on the other hand seen improved claims result compared to last year due to decreased travel activities by our customers.

The result of reinsurance recoveries and change of reinsurer's share of claim

provisions shows a compensation for ERV Nordic of DKK 34.9m in 2020 against DKK 1.7m in 2019. The increase is primarily due to recoveries on major corona crisis claims we received during 2020.

The claims costs net of reinsurance amount to DKK 160.7m against DKK 390.0m in 2019 which is a decrease of DKK 229.3m. The claims ratio net of reinsurance is 50.6% against 58.4% in 2019.

Net operating expenses for 2020 amounted to DKK 190.9m against DKK 290.2m in 2019, a decrease of DKK 99.3m.

Acquisition costs amount to DKK 122.1m against DKK 221.8m in 2019, a decrease of DKK 99.7m. The decrease is mainly due to lowered acquisition costs because of the discontinued sales of domestic healthcare insurances through Danish partner Dansk Sundhedssikring A/S.

The administrative expenses amount to DKK 69.2m against DKK 68.8m in 2019, a slight increase of DKK 0.4m. We have during 2020 done significant operational savings in the light of the corona crisis and furthermore adjustments that lower our costs levels going forward, but also affected redundancy costs taken in 2020.

Commissions and profit commissions from reinsurance amount to an income of DKK 0.4m compared to 0.4m in 2019. The reinsurance contracts with commission had the same volume in 2020 as in 2019 so therefore this income has been stable.

The total result of business ceded shows an income for ERV Nordic of DKK 28.4m in 2020 against a loss of DKK 4.9m in 2019. The income is due to DKK 34.9m reinsurance claim recovery incl. reinsurer's share of claim provisions due to corona crisis claims.

The above-described development in sales, claims and operating expenses results in a negative underwriting result of DKK 35.3m compared to a negative result DKK 13.4m in 2019. The cost ratio including acquisition costs amount to 59.5% against 43.3% in 2019. Total combined ratio net of reinsurance (total costs measured in relation to earned premiums) is 111.1% against 101.9% in 2019.

The result of investment activities before transfer of technical interest amounts to a loss of DKK 6.5m against a profit of DKK 6.4m in 2019.

The result from affiliated company ERV Pojistovna a.s of which ERV Nordic owns 75% of the share capital, shows a loss of DKK 3.2m against a profit of DKK 9.4m in 2019 due to the negative result ERV Pojistovna a.s delivered in 2020.

The result from associated companies is generated by Euro-Center Holding SE of which ERV Nordic owns 33,33% of the share capital and by European Ass. Holding of which ERV Nordic owns 20,00% of the share capital. In 2020 the result of associated companies shows a loss of DKK 8.0m against a loss of DKK 2.0m in 2019. The reason for the development is the negative

2020 result of Euro-Center Holding SE.

Income from investment properties amounts to DKK 3.5m against DKK 1.8m in 2019. A shift in tenants affected a one-time cost that decreased income in 2019.

Interest income etc. for the year amounts to DKK 5.4m compared to DKK 7.2m in 2019. As in 2019, our investment portfolio mainly consists of low-risk Danish and Swedish government bonds.

ERV Nordic is relatively sensitive to the development of the prices of bonds, exchange rates etc. The company has had a net loss in connection with realised and unrealised gains & losses of bonds, bond-based unit trusts and exchange rates of a total of DKK 3.3m against a loss of DKK 9.2m in 2019. The improvement compared to last year is mainly due to less loss in connection with unrealised value writedown of bonds.

Interest expenses amount to DKK 0.1m in 2020 compared to DKK 0.3m in 2019.

Administrative expenses related to investments amounts to DKK 0.6m, which is same level as last year. These expenses are primarily triggered by the services delivered by Munich Re (Münchener Rückversicherungs-Gesellschaft Aktiengesellschaft) that is our appointed investment asset manager.

Interest on insurance provisions amounts to DKK 1.0m compared to DKK 0.6m in 2019. The increase is due to increased

interest rates.

Other income amounts to DKK 8.3m compared to DKK 5.7m in 2019 and other expenses amount to DKK 5.2m compared DKK 4.6m in 2019. Other income and expenses mainly stem from a number of administration agreements where we deliver our renowned claims handling and assistance services to customers who prefer to self-cover their insurance risks.

Due to our negative result that can be offset against future profits, we consider a deferred tax asset in our 2020 tax result and thereby a positive impact of DKK 7.3m compared to a tax cost of DKK 1.8m in 2019.

Receivables from policyholders amount to DKK 5.3m against DKK 7.0m in 2019, whereas receivables from insurance brokers amount to DKK 6.2m against DKK 12.0m in 2019.

At 31 December 2020, the company's total capital and reserves amount to DKK 307.2m and total assets amount to DKK 579.3m.

Uncertainty in respect of recognition and measurement

The statement of the accounted value of certain assets and liabilities is conditioned by applying accounting estimates. The estimates made are based on assumptions which the management finds justifiable but uncertain. The statement of the insurance provisions is in particular connected to estimates.

Events after 31 December 2020

No events have occurred subsequent to the balance sheet date, which would have a material influence on the financial position of the company.

The result of the year compared to earlier statements

The company expected earlier the following for 2020:

"We expect significant decrease in gross written premium in ERV Denmark due to lowered sales through Dansk Sundhedssikring A/S. In addition the spread of the coronavirus and the actions taken by authorities during the first part of 2020 has a significant negative impact in regards to travel insurance sales and claims. Our investment portfolio consists mainly of low-risk Danish and Swedish government bonds, but we expect that the coronavirus will also negatively impact the result of our affiliated company.

In total, this means that the expectations for the result for 2020 are below the result ERV Nordic delivered in 2019."

The result of 2020 was in line with expectations. However, our diversified Nordic market and product approach together with a prudent reinsurance program enabled the company to maintain a solid financial position despite the negative impact by COVID 19.

Outlook for 2021

We expect continued negative impact by COVID 19 on our sales in both ERV Denmark and ERV Sweden. In line with the lowered travel activities by our customers, we will however also expect low claim costs. Our investment portfolio consists mainly of lowrisk Danish and Swedish government bonds, but we expect that the corona crisis will also negatively affect the result of our affiliated and associated companies.

In total, this means that the expectations for the result for 2021 are at the same level as the result ERV Nordic delivered in 2020.

The Board of Management of ERV Nordic has the following management positions:

Beata Danuta Kalitowska-Zborowska, Chief Executive Officer:

- Managing Director Europeiska ERV Filial, Stockholm, Sweden
- Member of Board of Management of International Travel Insurance Alliance (ITIA), Munich, Germany

David Kraul, Chief Operating Officer:

• Member of the Supervisory Board of Euro-Center Holding SE, Prague, Czech Republic

Peter Steen Olsen, Chief Financial Officer:

• Deputy Managing Director Europeiska ERV Filial, Stockholm, Sweden

The Board of Directors of ERV Nordic has the following management positions:

Christof Flosbach, Chairman:

- Member of Management Board of ERGO Reiseversicherung AG, Munich, Germany
- Managing Director of Globality S.A., Munsbach, Luxembourg
- Chairman of Supervisory Board of ERV Evropska pojistovna A.S., Prague, Czech Republic

Christian Søndergaard Larsen, Board Member:

• No other managing positions

Peter Fobian, Board Member:

• No other managing positions

Pay Policy

In accordance with the executive order on pay policy and disclosure requirements on pay roll in financial companies and financial holding companies, ERV Nordic has prepared a pay policy which can be found at this link: https://www.europaeiske.dk/privat/om-europaeiske/virksomheden/lonpolitik/ Please also see note 7.

Gender Composition in the Company's Governing Body

Section 132a of the Executive Order issued by the Danish Financial Supervisory Authority on financial reports for insurance companies and profession-specific pension funds requires that companies of a certain size set targets for the gender composition of the Board of Directors and the composition of the management and report on the matter. Regarding composition of management, a policy for increasing representation of the underrepresented gender must be established in case the requirements on composition are not met. On the Board of Directors as well as in management the composition should be a 40/60 pct. distribution or the number/pct. which is closest to 40/60 pct. in accordance to guidance from the Danish Business Authority.

Currently, the Board of Directors consists of 2 women and 4 men. ERV Nordic does, therefore, meet the gender distribution requirement of 40/60 pct. since 2 women out of 6 board members is considered a fulfilment of the 40/60 pct. requirement according to the guidance from the Danish Business Authority,

Regarding management level and the composition hereof, the Board of

Management of ERV Nordic currently consists of 3 persons. One member is woman and 2 members are men. Board of Management thereby meets the composition requirements for even gender distribution.

Audit Committee

The Board of Directors of ERV Nordic has established an Audit Committee. The Committee consists of three members of the Board of Directors.

The tasks of the Committee are set out in the "Audit Committee Charter" based on the Act on Approved Auditors and Audit Firms no. 1287 of 20 November 2018. The tasks of the Committee includes monitoring and control of the financial reporting process, the company's internal control system, risk management systems as well

as the effectiveness of the internal audit function. Furthermore, the Committee monitors the statutory audit of the Annual Report and the independence of the auditors.

When performing its tasks, the Audit Committee ensures that due regard is given to matters important to the company. The work of the Audit Committee is based on supervision of historical events and does therefore not include future events, expectations or forecasts.

The Audit Committee held three meetings during 2020. These meetings were spread out during the year and among other held in connection with the yearly reporting to the Company's Board of Directors and the Danish Financial Supervisory Authority.

Risk Management

Risk management is an integral part of our corporate management and is based on the risk strategy and risk appetite decided by the Board of Directors. ERV Nordic is exposed to various types of risks in the daily business and is committed to turning risk into value. Our means of risk management assists in achieving this goal and includes all strategies, methods and processes to identify, analyse, assess, control, monitor and report, both short- and long-term risks ERV Nordic face or may face in the future.

The Board of Directors has the ultimate responsibility for deciding on ERV Nordic's risk strategy, including the risk appetite. It is reviewed at least on a yearly basis and is considered in all strategic initiatives. Our aim of the risk strategy is to limit the impact of all risks in order to maintain a normal operation. ERV Nordic manages risks on a continuous basis to ensure that the risk exposure is within the risk appetite. If the risk exposure is assessed to be outside the approved risk appetite, then actions are taken to manage and/or mitigate the risks. The risk profile is reported on a quarterly basis to the Board of Management and the Board of Directors.

Organisational set-up of risk management

Risk management is performed at all levels in the organization and is structured according to the three "lines of defence";

1st line: Risk takers

2nd line: Risk Management Function,

Actuarial Function, Compliance Function

3rd line: Internal Audit Function

ERV Nordic, in accordance with Solvency II, defines the 2nd and 3rd line of defence as the "Key Functions".

Risk situation

The risk situation at ERV Nordic has been within the Board of Directors risk tolerance during 2020. Except for the corona crisis and related major claims, we have not faced any material, unexpected risks and the solvency situation has been above our internal trigger levels (yellow trigger equals 140%) as well as regulatory requirements. We acted in the light of the corona crisis and monitored the situation closely, both in terms of the claims development and in regards to our Business Continuity management.

Main risks of FRV Nordic:

- Underwriting risks
- Market risks
- Operational risks

Underwriting risks

Underwriting risk arises from inaccurate assessments of the compensations and other costs related to insurance policies. Significant underwriting risks are premium, if losses are higher than expected, and reserve risks, if the reserves set aside are not sufficient to cover the ultimate losses.

Relevant policies exist which are set by the Board of Directors. The overarching policy for underwriting risks states that risks originating from the company's insurance business shall be covered or limited to such a level that the company will be able to maintain a normal operation and carry out planned initiatives even in case of a very unfavourable development. One measure taken to limit the underwriting risk, is reinsurance agreements. This limits the risks for most events to a certain level according to the risk appetite set by the Board of Directors.

In the Standard model, this risk is estimated to DKK 147.3m.

Market Risks

It is the aim of ERV Nordic to control the market risks in such a way that the company obtains a return corresponding to risks taken.

Main market risks:

- Currency risk
- Equity risk
- Property risk
- Market risk concentrations

Currency risk arises as a result of a mismatch in the value of assets and liabilities in the same foreign currency. Internal guidelines, set by the Board of Directors, limits the exposure to a certain level. In terms of the result, the company is sensitive towards the development in currency rates and the prices of bonds, shares and participations.

Currency risk for ERV Nordic is mainly related to the investment in affiliated and

associated companies denominated in Czech koruna ("CZK") and the net assets in ERV Sweden denominated in Swedish krona ("SEK"). The investments in foreign entities and merger with ERV Sweden are based on strategic decisions and in line with the risk appetite set by the Board of Directors.

The standard model calculation has been used to assess the risks and the necessary capital for this type of risks. This model demands a capital of DKK 56.8m in order to be able to cover the risk sufficiently with a confidence level of 99.5%, which means that ERV Nordic can meet the policyholders' claims for 199 years out of 200 years.

Operational risks

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk is inevitably linked to the business activities of ERV Nordic. They are addressed in a comprehensive internal control system or through ad-hoc reporting.

ERV Nordic manages operational risks in accordance with internal guidelines and the risk appetite on an ongoing basis. It is reported to the Board of Directors as part of the risk report on a quarterly basis.

The standard model calculation demands a capital of DKK 10.3m in order to be able to cover the operational risk sufficiently with a confidence level at 99.5%, which means that ERV Nordic can meet the policyholders' claims for 199 years out of 200 years.

Other material risks

ERV Nordic is also exposed to strategic and reputational risks.

Strategic risks are risks arising from wrong business decisions or poor implementation of decisions already taken. ERV Nordic is exposed to a variety of strategic risks such as changes in the customer structure ("demography") and the buying behaviour ("digital disruption"). Additional risks may arise as a result of changes in the competitive environment. Strategic risks usually have an impact lasting over several years and when identified, they are analysed and remedial measures are taken when necessary.

Reputational risk is defined as the risk of damage that occurs if the value or brand name of ERV Nordic deteriorates. The impact ranges from reduced business opportunity to administrative additional expenses.

Ad hoc reporting and regular quarterly communication between the governance functions takes place. In addition, as part of the internal control system, a basic assessment of potential reputational loss for each operational risk is completed by both the Compliance Officer and the Risk Manager. If the risk is assessed as being above the process owner's acceptable range, then a measure is required and monitored.

Sensitivity Analysis

In accordance with the rules stipulated in BEK no. 615 of May 25th 2018, ERV Nordic

| Ser | sitivity Analysis as of 31.12 | Stress (Pct.) | SCR (Pct.) | |
|-----|-------------------------------|-------------------------|------------------|------|
| 1. | Interest rate risk | | 200 basis points | 190% |
| 2. | Equity risk | | 100% | 152% |
| 3. | Property risk | | 100% | 125% |
| | | Danish government bonds | 97% | 125% |
| 4. | Spread risk | Other government bonds | 100% | 173% |
| | | Other bonds | 63% | 125% |
| | | Exposure 1 (CZK) | 100% | 157% |
| 5. | Currency risk | Exposure 2 (SEK) | 100% | 195% |
| | | Exposure 3 (USD) | 100% | 189% |
| 6. | Counterparty default risk | | | 101% |

has calculated sensitivity analysis on a quarterly basis. The sensitivity analysis done as of 31st December 2020 shows that we are able to withstand changes in the significant risk categories.

There are no stresses to the risk categories that will lead to an MCR of 125% nor 100%. The MCR ratios with maximum stress leads to MCR ratios between 583% to 984%.

Capital management and requirements

ERV Nordic's Solvency II requirement is calculated on the basis the company's risk profile, and therefore takes into consideration the composition of ERV Nordic's insurance portfolio, cash flow profile, technical provisions, reinsurance program, investment mix and risk diversification.

The Board of Directors of the company has estimated that a security level of 99.5% has to be used for the capital demands. ERV Nordic has calculated the capital requirement based on a security level of 99,5% and according to the Standard model under Solvency II which means that ERV Nordic can meet the policyholders' claims for 199 years out of 200 years. The model has been tested during the last 3 years and ERV Nordic has always had more than sufficient capital to meet the security level of 99.5%.

The solvency capital requirements (SCR) have been calculated to DKK 126.1m and shall be covered by the company's eligible own funds of DKK 249.0m as of 31st December 2020 affecting a solvency ratio of 197%.

Below is shown a five-year overview of the solvency ratio.

| | Solvency ratio |
|------|----------------|
| 2020 | 197% |
| 2019 | 143% |
| 2018 | 176% |
| 2017 | 185% |
| 2016 | 249% |

Fitch rating

ERV Nordic has an 'A+' (stable outlook) Insurer Financial Strength (IFS) Rating from Fitch.

SIGNATURES OF THE BOARD OF MANAGEMENT AND THE BOARD OF DIRECTORS

We have today presented the annual report for 1 January – 31 December 2020 to ERV Nordic.

The annual report has been prepared in accordance with Financial Business Act. The annual report gives a true and fair view of the company's assets, liabilities and financial position as of 31 December 2020 together with the results of the company's activities for the financial year 1 January – 31 December 2020.

The management report contains a fair and true review of the development of the company's activities and financial performance together with a description of the most significant risks and elements of uncertainty that may have an impact on the company.

We recommend the annual report to be approved at the annual general meeting.

Copenhagen, 16th of April 2021

Independent Auditor's report

To the shareholder of Europæiske Rejseforsikring A/S

Opinion

We have audited the financial statements of Europæiske Rejseforsikring A/S for the financial year

1 January – 31 December 2020, which comprise income statement, statement of comprehensive income, balance sheet, statement of changes in equity and notes, including accounting policies. The financial statements have been prepared in accordance with the Danish Financial Business Act.

In our opinion, the financial statements give a true and fair view of the financial position of the Company at 31 December 2020 and of the results of the Company's operations for the financial year 1 January – 31 December 2020 in accordance with the Danish Financial Business Act.

Our opinion is consistent with our longform audit report to the Audit Committee and the Board of Directors.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (ISAs) and additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these rules and requirements.

To the best of our knowledge, we have not provided any prohibited non-audit services as described in article 5(1) of Regulation (EU) no. 537/2014.

Appointment of auditor

At the Annual General Meeting on 30 April 2020, we were elected as auditor for Europæiske Rejseforsikring A/S for the first time.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements for the financial year 2020. These matters were addressed during our audit of the financial statements as a whole and in forming our opinion thereon. We do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled our responsibilities described in the "Auditor's responsibilities for the audit of the financial statements" section, including in relation to the key audit matters below. Our audit included the design and performance of procedures to respond to our assessment of the risks of material misstatement of the financial statements.

The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the financial statements.

MEASUREMENT OF CLAIMS PROVISIONS

At 31 December 2020, claims provisions amounted to DKK 81 million.

Measurement of claims provisions involves management estimates and assumptions regarding future events which materially affect the carrying amount. Consequently, we consider it a key audit matter.

Significant management estimates regarding claims provisions include:

 Determination of calculation methods and models Expected future payments for claims that occurred before the balance sheet date and expected closing of claims, including claims handling expenses.

Management has described the methods, models and key assumptions for measurement of claims provisions as part of the accounting policies in note 1.

Our audit of claims provisions

Based on our risk assessment, we have examined the measurement of claims provisions performed by Management.

Our audit has comprised assessing the models, methods, assumptions and data applied by Management in connection with the calculation of the claims provisions. The audit procedures performed in cooperation with our actuarial specialists included:

- Assessment and test of design, implementation and performance of key controls in the actuarial models, data collection and data analysis as well as processes for determination of assumptions
- Assessment of the methods applied using our industry knowledge and experience, focusing on changes compared to last year and look-back analysis on run-off results and assumptions previously applied by Management
- Assessment of assumptions about expected loss ratios compared with historical data and market practice
- ► Re-calculation of selected parts of the claims provisions

STATEMENT ON THE MANAGEMENT'S REVIEW

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review meets

the disclosure requirements of the Danish Financial Business Act.

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Business Act. We did not identify any material misstatement of the Management's review.

MANAGEMENT'S RESPONSIBILITIES FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the Danish Financial Business Act. Moreover,

Management is responsible for such internal control as Management determines is necessary to enable the preparation of financial

statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or

error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit conducted in accordance with ISAs and additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- ► Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- ► Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- ► Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Based on the matters communicated to those charged with governance, we determine which matters were of most importance in our audit of the financial statements for the current period and therefore are key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Notes

NOTE 1 - ACCOUNTING POLICIES APPLIED

General

The annual report has been prepared in accordance with the Danish Financial Business Act and the executive order issued by the Danish Financial Supervisory Authority on financial reports for insurance companies and profession-specific pension funds.

The company has received permission to prepare the annual report solely in English from the Danish Financial Supervisory Authority.

The annual report is presented in thousand DKK.

Accounting policies are unchanged from last year.

Accounting estimate

The preparation of annual reports under the Danish Financial Supervisory Authority's executive order requires the use of certain critical accounting estimates and requires the management to exercise its judgment in the process of applying the company's accounting policies.

The statement of the accounted value of certain assets and liabilities is conditioned by applying accounting estimates. The

estimates made are based on assumptions which the management finds justifiable but uncertain. The statement of the insurance provisions is in particular connected to estimates. These estimates are described in more details in the below-mentioned under the individual accounting items.

Recognition and measurement

Assets are recognised in the balance sheet when it is probable that future economic benefits will flow to the company and the value of the asset can be reliably measured.

Liabilities are recognised in the balance sheet when the company has a legal or constructive obligation as a result of a prior event, and it is probable that future economic benefits will flow out of the company, and the value of the liabilities can be measured reliably.

On initial recognition, assets and liabilities are measured at fair value, however tangible and intangible assets are measured at cost.

Measurement subsequent to initial recognition is effected as described below for each financial statement item.

Anticipated risks and losses that arise before the time of presentation of the annual report and that confirm or invalidate affairs and conditions existing at the balance sheet date are considered at recognition and measurement.

Income is recognised in the income statement as earned, whereas costs are recognised by the amounts attributable to this financial period. Value adjustments of financial assets and liabilities are recorded in the income statement unless otherwise described below.

Intra-group transactions

The remuneration for the administration of the group's companies is based on the costs of such administration. The interest charged on intra-group accounts is the market rate when these accounts are not considered current business accounts.

Other services (including reinsurance) rendered as part of ordinary insurance operations to and from intra-group buyers are settled at market rates.

Intra-group trading in assets, including securities, is conducted at market prices. No significant intra-group trading with assets has taken place during the accounting year.

Foreign currency transactions

The company's functional currency is DKK in respect of business and investments originating from Denmark. The functional currency used by the company's branch in Sweden is SEK.

Receivables and payables recognised in foreign currency are translated at the exchange rate prevailing at the balance sheet date. The difference between the exchange rate prevailing at the balance sheet date and the exchange rate prevailing at the time when such receivables or payables arose or were recognised in the latest annual report is recognised in the income statement as value adjustments.

Profit and loss of the foreign branch is translated into the company's functional currency, DKK, at the exchange rate prevailing at the date of transaction. The value of the branch's balance sheet items are translated at the exchange rate prevailing at the balance sheet date.

Consolidated accounts

The company has chosen not to prepare consolidated accounts in accordance with §134 in the executive order issued by the Danish Financial Supervisory Authority on financial reports for insurance companies and profession-specific pension funds, as the company's ultimate parent company, Münchener Rückversicherungs-gesellschaft, Munich, Germany, prepares consolidated accounts in which the company and its subsidiaries are included.

PROFIT AND LOSS ACCOUNT

RESULT OF INSURANCE OPERATIONS

Premium income, net of reinsurance

Premium income, net of reinsurance consists of the premiums collected for the year less ceded reinsurance premiums, adjusted for movements in the unearned premium provision.

Technical interest, net of reinsurance

According to the Danish FSA's executive order, technical interest is presented as a calculated return on the year's average insurance liability provisions, net of reinsurance. The interest is applied according to the expected run-off pattern of the provisions.

Technical interest is reduced by the portion of the increase in net provisions that relates to unwinding of discounting.

Claims incurred, net of reinsurance

Claims incurred, net of reinsurance consist of the claims paid together with direct and indirect costs for claims handling less reinsurance recoveries, adjusted for movements in the outstanding claims reserve.

As a result, claims incurred, net of reinsurance consist of reported and expected claims for the accounting year. Furthermore, run-of gains or losses on previous years' provision for outstanding claims are included in claims incurred. The portion of the increase of the provisions that relates to reduction of term has been transferred to technical interest.

Changes in provisions of claims due to changes in the yield curve and exchange rates are recognized as a value adjustment.

Bonus and premium discounts

Bonus and premium discounts represent anticipated and reimbursed premiums where the amount reimbursed depends on the claims record, and for which the criteria for payment have been defined prior to the financial year or when the business was written.

Insurance operating expenses, net of reinsurance

Insurance operating expenses represent acquisition costs and administrative expenses less reinsurance commissions received. Expenses relating to acquiring and renewing the insurance portfolio are recognised at the time of writing the business. Administrative expenses are accrued to match the financial period.

Investment activities

Income from affiliated companies includes the company's share of the affiliates' net profit.

Income from associates includes the company's share of the associates' net profit.

Income from domicile properties before fair value adjustment represents the profit from property operations less property management expenses for the part of the property which is not used by the company. Profit from property operations derives

from rental agreements with tenants. All tenants have less than one-year tenures.

Interest, dividends, etc. represent interest earned, dividends received, etc. during the financial period.

Realised and unrealised investment gains and losses are gains and losses on investments, value adjustment of land and buildings and exchange rate adjustments. Investment management charges represent expenses relating to the management of investments.

OTHER ITEMS

Other income and expenditure

Other income and expenditure contain income and expenses on administration agreements, which cannot be attributed to the insurance portfolio.

Taxation

Tax on the profit for the year is calculated on the basis of the profit for the year before tax, adjusted for non-taxable income and expenditure.

The company is jointly taxed with Danish group companies. Full intra-group tax equalisation is effected so that the company pays for the utilisation of contingent negative taxable income from the jointly taxed company and the company is refunded by the jointly taxed company for its utilisation of contingent taxable deficits of the company.

Deferred tax related to recapture of previously deducted deficits in foreign branches or affiliates' entities is included based on an actual assessment of the purpose of the individual entity.

Deferred tax is measured according to the tax rules and at the tax rates in Denmark and Sweden which based on the legislation in force at the balance sheet date will apply when the deferred tax liability is expected to be settled or when the deferred tax asset is expected to be realised.

If deferred tax constitutes a tax asset, it is included in the assets, if it is most probably that it can be used in the future. The tax liable on the contingency reserve (contingent tax) is not provided for in the balance sheet.

The company has not made provisions for deferred tax on contingency funds as it is not likely that a situation will arise within the foreseeable future which will result in taxation.

BALANCE SHEET

Intangible assets

The assets are measured at the acquisition costs with deductions of the write down. A straight-line write down is applied based on the following assessment of the assets' expected useful lives:

Software, presently 3-5 years

Costs that are directly associated with the production of identifiable and unique software products are recognised as intangible assets. Direct costs include the software development team's employee costs and other directly related overheads. All other costs associated with developing or maintaining computer software are recognised as an expense when incurred.

After completion of the development the asset is written down on a straight-line basis over the expected useful life, however, presently with a maximum period of 5 years. The basis of writing down is reduced by any impairment write downs.

Operating equipment

Furniture and operating equipment are measured at cost price less accumulated write down and any accumulated impairment losses. The cost price includes the purchase price and costs directly related to the purchase of the relevant assets until the time when the assets are ready for use.

The tangible assets are written down on a straight-line basis from the following assessment of the assets' expected useful lives, as follows:

- Furniture and other operating equipment, presently 5 years
- Computer hard and software, presently 3-5 years
- Motor vehicles, presently 5 years

The assets' residual values and useful lives are reviewed at each balance sheet date and adjusted if appropriate.

Gains and losses on disposals and retirements are determined by comparing proceeds with carrying amount. These are included in the income statement. When revalued assets are sold, the amounts included in the revaluation reserve are transferred to retained earnings.

Leasing - Accounting policies before January 1, 2019

Leases are divided into financial and operational leasing liabilities. A lease is recognised as financial when substantially all the risks and gains of owning the leased asset are transferred to the lessee. Other leases are classified as operational.

Leasing costs related to operating leases are recognized on a straight-line basis in the profit and loss statement over the lease period.

Leasing - Accounting policies after January 1, 2019

Before start of a lease contract, the company assesses whether a contract can be determined as a right-of-use asset (ROU asset). A ROU asset has the following conditions:

- The asset is explicitly identifiable
- The company has the right to get almost all the economic benefits from use of the asset throughout the period of use

• The company has the right to choose how to use the asset

The company recognises ROU assets and corresponding lease liabilities with respect to all lease agreements in which it is the lessee, excluding short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. At start or on reassessment of a contract that contains lease components, the company allocates the consideration in the contract to each lease component based on their relative stand-alone prices.

ROU assets and lease liabilities are recognised at the lease commencement date. The ROU assets are initially measured at cost price, which is calculated as the present value of the lease obligation including prepaid lease payments, any direct costs associated with the acquisition and any costs for dismantle and disposal of the asset at the end of the lease period, which the lessee is obliged to pay. ROU assets are depreciated on a straight-line basis over the shortest period of the lease term and the useful life of the assets.

Lease liabilities

Lease liabilities are measured at the present value of the lease payments that are not yet paid, discounted using the rate implicit in the lease. If this rate cannot be determined, the company uses its incremental borrowing rate. Subsequently, the lease liability is measured at amortised cost using the effective interest method and is presented as part of the amount shown

under "Leasing liabilities" within Liabilities. It is re-measured when there is a change in future lease payments. An adjustment is made to the carrying amount of the corresponding ROU asset.

Impairment of intangible assets and operating equipment

Finalized development projects and development projects in progress are tested for impairment in connection with the annual report and during the year if there is any indication of impairment. The carrying amount of other intangible assets and operating equipment is reviewed at least annually to determine whether there is any indication of impairment.

If there are indications of impairment, the carrying amount is written down to the estimated recoverable amount of the asset if this is lower than the carrying amount. The recoverable amount is the higher of an asset's fair value less costs to sell and the expected value in use.

Domicile

Domiciles are measured in the balance sheet at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation. Revaluations are performed regularly to avoid the carrying amount differing from the domicile's fair value at the balance sheet date.

The fair value is calculated based on a market-determined rental income, as well as operating expenses in proportion to the

property's required rate of return in percent.

Increases in the revalued carrying amount of domiciles are credited in equity, unless the increase corresponds to a decrease previously credited to the income statement.

Decreases are credited to the income statement unless the decrease corresponds to an increase previously credited to equity.

The write downs are recognized in the profit and loss account over their useful lives. The expected useful life is measured regularly.

The company assessed at the time of the change-over to the rules of Danish Financial Supervisory Authority's executive order on financial reports that the useful life is 50 years and the scrap value is 70%.

Capital holdings (shares) in affiliated and associated companies

Shareholdings are stated at their equity value using the equity method. As a result, the shareholdings are shown in the balance sheet as the pro rata share of the companies' equity value, and the company's share of the result is included in the profit and loss account under "income from affiliated or associated companies".

The total net revaluation of capital holdings in affiliated and associated companies are included in the net revaluation reserve in equity, if the book value is higher than the cost price.

Other financial assets

Listed bonds and capital investments are stated at the price listed at closing time on the date of the balance sheet. However, drawn bonds are stated at fair value.

Unlisted capital investments are stated as the estimated market value, based on the last available annual accounts of the company in question.

Secured loans are stated as the estimated fair value at the balance sheet date.

The settling day is used as the time of calculation for all investment assets.

Reinsurers' share of provisions for insurance contracts

Contracts entered into by the company with reinsurers under which the company is compensated for losses on one or more contracts issued by the company and that meet the classification requirements for insurance contracts are classified as reinsurance share of the technical provision.

Amounts recoverable from reinsurers are measured consistently with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract.

The benefits to which the company is entitled under its reinsurance contracts held are recognised as assets and reported as reinsurers' share of claim provisions for insurance contracts.

The reinsurers' share of the provisions for claims is measured at discounted value if such discounting is material. The future payments will be discounted back according to the risk-free interest rates announced by EIOPA without volatility adjustment.

The company assesses continuously its reinsurance assets for impairment. If there is objective evidence that the reinsurance asset is impaired, the company reduces the carrying amount of the reinsurance asset to its recoverable amount and recognises that impairment loss in the income statement.

Debtors

Debtors are stated net of a bad debt reserve calculated on the basis of an individual assessment of the debtors.

Accruals

Accruals, reported under assets, comprise cost paid relating to the following financial period.

EQUITY

Share capital

Shares are classified as equity when there is no obligation to transfer cash or other assets

Revaluation provisions

Revaluation of owner-occupied property is recognized in other comprehensive income unless the revaluation offsets a previous impairment loss. Revaluation reserves show the net revaluation of the owner-occupied property.

Contingency reserves

The Danish contingency reserve is recognized as part of retained earnings under equity. The reserve may only be used when so permitted by the Danish Financial Supervisory Authority and when it is for the benefit of the policyholders. The funds allocated to the contingency reserve are not taxed and there has been no deferred tax allocated in the balance sheet.

The Swedish contingency reserve is reported as an untaxed reserve. Changes are recognized through equity. The basis for the calculation is based on a directive from the Swedish Financial Supervisory Authority. The directive indicates the maximum amount that may be allocated to the contingency reserve, based on written premiums and the provision for claims outstanding. ERV Sweden continuously calculates the maximum scope for provisions. At year-end the company had not utilized the maximum scope.

Other reserves

The total net revaluation of capital holdings in affiliated and associated companies is recognized via appropriation of profit to the net revaluation reserve in equity (other reserves), if the book value is higher than the cost price.

Currency adjustments comprise exchange differences arising from translation of the contingency reserve and the equity of foreign entities at the beginning of the year to the exchange rate prevailing at the balance sheet date.

Proposed dividend

The proposed dividend is recognized as a liability at the time of the adoption by the shareholders at the annual general meeting. Dividend to be paid out for the year is shown as a separate item under equity.

TECHNICAL RESERVES

Provisions for insurance contracts

The company have chosen to use the simplified calculation of premium provision according to the Danish Executive Order on Financial Statements § 69a.

Provisions for insurance contracts are recognised as future payments including payments for administration and claims handling regarding future events for in-force policies. However, as a minimum to the part of the premium calculated using the pro rata temporis principle until the next payment date. Adjustments are made to reflect any variations in the incidence of risk. For new annual insurance policies, where a considerable part of the risk is in the immediate continuation of the date they become effective, we add as income 50% of the premium within the first 2-3 weeks and then distribute the rest according to the pro rata temporis principle.

The provisions also include amounts reserved to cover risk in connection with increasing age. These provisions are reserved when there no longer is a natural premium and the risks covered increase with the insured person's age.

The provisions for insurance contracts are recognised, taking into account, the deductions for direct acquisition costs.

Provisions for claims

Provisions for claims include direct and indirect claims handling costs arising from events that have occurred up to the balance sheet date. Provisions for claims are estimated using the input of assessments for individual cases reported to the company and statistical analyses for the claims incurred but not reported and the expected ultimate cost of more complex claims that may be affected by external factors (such as court decisions).

Claims provisions are discounted, if such discounting is material. Discounting is based on the risk-free interest rates announced by EIOPA without volatility adjustment.

Risk margin on insurance contracts

Risk margin on insurance contracts are the expected amount payable if the company's portfolio of insurance contracts were transferred to another company.

Provisions for bonus and premium rebates

Provisions for bonus and premium rebates represent amounts expected to be paid to policyholders in view of the claims experience during the financial year

Liability adequacy test

Tests are continuously performed to ensure the adequacy of the technical provisions. In performing these tests, current best estimates of future cash flows of claims, gains and direct and indirect claims handling costs are used. Any deficiency is charged to the income statement by raising the relevant provision.

Financial liabilities

Bond loans, debt to credit institutions, etc. are recognised at the raising of the loan at a fair value plus transaction costs incurred.

Debt

Other liabilities are measured at net realisable value.

Methods for calculating financial ratios

The financial ratios have been calculated in accordance to the Danish Financial Business Act. The ratios included in the five-year review have been calculated as described below:

Gross claims ratio is the relation between gross claims incurred and gross earned premiums, where earned premiums are reduced by bonuses and rebates.

Gross expense ratio is the relation gross operating expenses and gross earned premiums less bonuses and rebates

Reinsurance ratio is the profit/loss from reinsurance in proportion to gross earned premiums less bonuses and rebates.

Combined ratio is the sum of the gross claims ratio, the gross expense ratio and the net reinsurance ratio.

Operating ratio is calculated as the combined ratio, but based on the claims ratio, the expense ratio and the net reinsurance ratio where the allocated investment return has been added to earned premiums in the denominator.

Relative run-off result is the run-off result in relation to the corresponding opening provision.

Return on capital and reserves is profit of the year in relation to average capital & reserves.

Note in DKK'000

| | Deferred tax assets | -7,601 | -6,706 |
| | Reserves for deferred tax | 12,031 | 17,624 |
| | | 4,430 | 10,918 |
| | Contingency tax | | |
| | A realease of the Danish contigency reserve will trigger a tax of | 20,240 | 22.770 |
| | A realease of the Swedish contigency reserve will trigger a tax of | 15,206 | 11.018 |
| | A total release of the contingency reserve will trigger a tax of | 35,446 | 33.788 |
| | | | |

The technical provision for the Danish business is not expected to fall below the level of 90% of 31 December 1994. No provision for deferred tax on the Danish contingency reserve has therefore been made.

A directive from the Swedish Financial Supervisory Authority indicates the maximum amount that may be allocated to the Swedish contingency reserve. ERV Sweden continuously calculates the maximum scope for provisions. At year-end the company had not utilized the maximum scope.

Intra-group transactions

The remuneration for the administration of the group's companies is based on the costs of such administration. The interest charged on inter-company accounts is the market rate when these accounts are not considered current business accounts.

25 Ownership and related parties (continued)

Other services (including assistance services, asset management and reinsurance) rendered as part of ordinary insurance operations to and from inter-company buyers are settled at market rates.

Inter-company trading in assets, including securities, is conducted at market prices. No significant inter-company trading with assets has taken place during the accounting year.

Consolidated accounts

The company has chosen not to prepare consolidated accounts in accordance with §134 in the executive order issued by the Danish Financial Supervisory Authority on financial reports for insurance companies and profession-specific pension funds, as the company's ultimate parent company, Münchener Rückversicherungsgesellschaft, Munich, Germany, prepare consolidated accounts for the whole group.

26 Risk Management

Underwriting risks

Underwriting risk arises from inaccurate assessments of the compensations and other costs related to insurance policies. Significant underwriting risks are premium, if losses are higher than expected, and reserve risks, if the reserves set side are not sufficient to cover the ultimate losses.

Relevant policies exist which are set by the Board of Directors. The overarching policy for underwriting risks states that risks originating from the company's insurance business shall be covered or limited to such a level that the company will be able to maintain a normal operation and carry out planned initiatives even in case of a very unfavourable development. One measure taken to limit the underwriting risk, is reinsurance agreements. This limits the risks for most events to a certain level according to the risk appetite set by the Board of Directors.

In the Standard model, this risk is estimated to DKK 147.3m.

Market risks

It is the aim of ERV Nordic to control the market risks in such a way that the company obtains a return corresponding to risks taken.

Main market risks:

- Currency risk
- Equity risk
- Property risk
- Market risk concentrations

Currency risk arises as a result of a mismatch in the value of assets and liabilities in the same foreign currency. Internal guidelines, set by the Board of Directors, limits the exposure to a certain level. In terms of the result, the company is sensitive towards the development in currency rates and the prices of bonds, shares and participations.

Currency risk for ERV Nordic is mainly related to the investment in affiliated and associated companies denominated in Czech koruna ("CZK") and the net assets in ERV Sweden denominated in Swedish krona ("SEK"). The investments in foreign entities and merger with ERV Sweden are based on strategic decisions and in line with the risk appetite set by the Board of Directors.

The standard model calculation has been used to assess the risks and the necessary capital for this type of risks. This model demands a capital of DKK 56.8m in order to be able to cover the risk sufficiently with a confidence level at 99.5%, which means that ERV Nordic can meet the policyholders' claims for 199 years out of 200 years.

26 Risk Management (continued)

Operational risks

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk is inevitably linked to the business activities of ERV Nordic. They are addressed in a comprehensive internal control system or through ad-hoc reporting.

ERV Nordic manages operational risks in accordance with internal guidelines and the risk appetite on an ongoing basis. It is reported to the Board of Directors as part of the risk report on a quarterly basis.

The standard model calculation demands a capital of DKK 10.3m in order to be able to cover the operational risk sufficiently with a confidence level at 99.5%, which means that ERV Nordic can meet the policyholders' claims for 199 years out of 200 years.

Other material risks

ERV Nordic is also exposed to strategic and reputational risks.

Strategic risks are risks arising from wrong business decisions or poor implementation of decisions already taken. ERV Nordic is exposed to a variety of strategic risks such as changes in the customer structure ("demography") and the buying behaviour ("digital disruption"). Additional risks may arise as a result of changes in the competitive environment. Strategic risks usually have an impact lasting over several years and when identified, they are analysed and remedial measures are taken when necessary.

Reputational risk is defined as the risk of damage that occurs if the value or brand name of ERV Nordic deteriorates. The impact ranges from reduced business opportunity to administrative additional expenses.

Ad hoc reporting and regular quarterly communication between the governance functions takes place. In addition, as part of the internal control system, a basic assessment of potential reputational loss for each operational risk is completed by both the Compliance Officer and the Risk Manager. If the risk is assessed as being above the process owner's acceptable range, then a measure is required and monitored.

Note In DKK'000

27 Fair value hierarchy

"Quoted market prices and consolidated reference prices" (level 1) consists of financial instruments that are quoted and traded in an active market. Such instruments include mainly our Danish and Swedish government bonds. Valuation based on "observable input" (level 2) consists of financial instruments that are valued substantially on the basis of observable input other than quoted price or consolidated reference price for the instrument itself. Valuation based on significant "non-observable input" (level 3) consist of certain financial instruments based substantially on non-observable input. Such instruments include our shares in affiliated and associated companies and our investment property
